1. The Applicant represents all parties in interest and shall furnish material, do all work, pay all costs and shall in a reasonable length of time restore the damaged portions of the highway to a condition similar or equal to that existing before the commencement of the described work, including any seeding or sodding necessary.
2. The proposed work shall be located and constructed to the satisfaction of the County Engineer or his duly authorized representative. No revisions or additions shall be made to the proposed work on the right-of-way without the written permission of the County Engineer.
3. The Applicant shall at all times conduct the work in such a manner as to minimize hazards to vehicular and pedestrian traffic. Traffic controls and work site protection shall be in accordance with the applicable requirements of Chapter 6 (Traffic Controls for Highway Construction Maintenance Operations) of the Illinois Manual on Uniform Traffic Control Devices for Streets and Highways and with the traffic control plan if one is required elsewhere in the permit. All signs, barricades, flaggers, etc., required for traffic control shall be furnished by the Applicant. The work may be done on any day except Sunday, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Work shall be done only during daylight hours.
4. The work performed by the Applicant is for the bonafide proposed expressed and not for the purpose or nor will it result in the parking or servicing of vehicles on the highway right-of-way. Signs located on or overhanging the right-of-way shall be prohibited.
5. The Applicant, his successors or assigns, agrees to hold harmless the County and it's duly appointed agents and employees against any action for personal injury or property damage sustained by reason of the exercise of this permit.
6. The Applicant shall not trim, cut or in any way disturb any trees or shrubbery along the highway without the approval of the County Engineer or his duly authorized representative.
7. The County reserves the right to make such changes, additions, repairs and relocations within its statutory limits to the facilities constructed under this permit or their appurtenances on the right-of-way as may at any time be considered necessary to permit the relocation; reconstruction, widening, or maintaining of the highway and/or provide proper protection to live and property on or adjacent to the County right-of-way. However, in the event this permit is granted to construct, locate operate and maintain utility facilities on the County right-of-way, the Applicant, upon written request by the County Engineer, shall perform such alterations or change of location of the facilities, with expense to the County and should the Applicant fail to make satisfactory arrangements to comply with this request within a reasonable time; the County reserves the right to make such alterations or change of location or remove the work, and the Applicant agrees to pay for the cost incurred.
8. The permit is effective only insofar as the County has jurisdiction and does not presume to release the Applicant from compliance with the provisions of any existing statutes or local regulations relating to the construction of such work.
9. The construction of access driveways is subject to the regulations in accordance to the Illinois Department of Transportation Entrance Policies. If in the future, the land use of property served by an access driveway described and constructed in accordance with this permit changes so as to require a higher driveway type as defined in that policy, the owner shall apply for a new permit and bear the costs for such revisions as may be required to conform to the regulations listed in this policy.
10. The Applicant affirms that the property lines shown on the attached sheet(s) are true and correct and binds and obligates him to perform the operation in accordance with the description and attached sketch and to abide by these regulations.

In the construction of the drive, the earth for a least 8" shall be removed from the shoulder for its full width (starting at the end of the pavement) and be replaced with material used in the construction of the drive. The grade of the driveway, shall slope downward from the road surface at a rate equal to the slope of the shoulder, but not less than 3/16 in 1', for a distance of 15' from the edge of the pavement.

The Applicant or his Contractor (or Contractors) shall control and protect all vehicular and pedestrian traffic by use of signs, barricades, flagmen, lights, watchmen and by any other means as required in the Manual on Uniform Traffic Control Devices for Streets and Highways during the progress of the work as described within this permit. Minimum desirable standards are attached for normal situations. However, additional protection must be provided when special complexities and hazards arise.

The culvert pipe shall conform to Section 542 of the State of Illinois, Standard Specifications for Road and Bridge Construction.
