## **OVERVIEW**

The Marshall County ETSB Department, Marshall County, IL, (the "Client") requires GIS and/or mapping related products and services. WTH Technology (the "Company") is a provider of such products and services. This agreement defines the scope of products and services to be offered by the Company and the compensation to be paid by the Client.

## **DESCRIPTION OF PRODUCTS AND SERVICES**

### **Hosted Think AVL® Software Subscription**

#### **Server Configuration**

The Company shall provide the Client with access to Think AVL® Server configured in an internet based hosted environment. The Company shall install Think AVL® Server Software on the WTH network and configure a unique URL for access exclusively by the Client. The Company will use a variety of security methods to restrict access to the Think AVL® Server only to Client specified users.

The Think AVL® Server software coordinates the interface between the Client's supplied wireless data network and computers connected to an IP based network which will be viewing the real time vehicle locations on Think GIS® displays. The Think AVL® Server software processes incoming GPS messages from the vehicles and formats the information for display on one or more computers running the Think GIS® software.

The Think AVL® Server software will be configured to receive and process vehicle location data from the Client's vehicles. Vehicle location reports can be transmitted to the Think AVL® Server via a variety of wireless networks capable of transmitting GPS coordinates. The Company will advise the Client regarding its existing wireless infrastructure and its ability to support vehicle location transmissions. No GPS receivers, radio modems, or other wireless data network components are provided as part of this project unless specifically stated as a provision in this Agreement.

In this case the Client will provide GPS Enabled cellular air cards and a corresponding cellular data plan for each card. The Client will install and configure the air cards in Client supplied laptop computers in each vehicle. The Company will install Think AVL® Client Software on each laptop and configure it to retrieve the vehicle location coordinates from the internal GPS unit and forward it through the air card to the Think AVL® Server Software.

The Client should be aware that the effectiveness of GPS enabled cellular air cards is dependent on several factors beyond the control of the Company. The location of the air card within the vehicle and the use of an external GPS antenna or lack thereof may affect the ability of the system to consistently and accurately provide vehicle location reports. The Company will assist the Client by providing a test environment to allow for the real world testing of the Client's chosen hardware solution prior to contract signing.

No GPS receivers, radio modems, or other wireless data network components are provided as part of this project unless specifically stated as a provision in this Agreement.

#### **Viewing of AVL Data**

In order to view the locations of vehicles reporting to the Think AVL® Server the Client must purchase Think GIS® software. Think GIS® must be installed on a computer which has access to the internet. The Company will assist with configuring Think GIS® to retrieve and display the vehicle location reports from the Think AVL® Server via the internet connection. The Company will advise the client on any network access required to accommodate the reception of vehicle transmission reports. The Company will not perform any network deployment or configuration as part of this Agreement.

## **AVL Administrative Monitoring and Reporting**

The Client will be provided with **(1) Think AVL® Administrator software license** which can be installed on any computer with internet access. Think AVL® Administrator software will provide the Client with the ability to connect to the Think AVL® host computer and perform administrative and system reporting functions. Among the capabilities available through Think AVL® Administrator software are:

- View a list of the mobile units reporting to the server
- Change display options such as unit label, color or icon
- Manage shifts by assigning individuals to vehicles
- View historical activity in real or compressed time\*
- Create unit activity reports\*
- Create activity reports for selected locations\*
- Import unit activity to a Think GIS® map layer\*

\* In order to take full advantage of these reporting capabilities of Think AVL® Administrator, a Think GIS® software license is required.

## **Think AVL® Server Host Access and Warranties**

The Company shall maintain the Client's Think AVL® Server Host on a continuous 24-hour basis during the term of this Agreement with the exception of planned and scheduled maintenance periods.

There is no warranty that the Think AVL® Server Host will operate without interruption or be error free. If there is an interruption or error in Client's Think AVL® Server Host, the Company shall be obligated to promptly respond to notification by Client of a problem, propose a solution, and with Client's approval correct the problem within a reasonable time at Company's expense.

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, COMPANY DISCLAIMS ANY AND ALL EXPRESS WARRANTIES, WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND IMPLIED WARRANTIES OF MERCHANTABILITY. COMPANY WILL NOT BE LIABLE FOR ANY LOSS OF BUSINESS OR PROFITS, OR FOR ANY CONSEQUENTIAL, INCIDENTAL, PUNITIVE, OR SIMILAR DAMAGES, OR, OTHER THAN AS SET FORTH IN THIS AGREEMENT, FOR CLAIMS OF DAMAGES MADE BY ANY THIRD PARTY FOR ANY CAUSE WHATSOEVER, REGARDLESS OF THE FORM OF ACTION, WHETHER IN CONTRACT OR IN TORT, INCLUDING NEGLIGENCE, EVEN IF IT HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. EACH PARTY ACKNOWLEDGES THAT THIS LIMITATION OF LIABILITY REFLECTS AN INFORMED, VOLUNTARY ALLOCATION BETWEEN THE PARTIES OF THE RISKS (KNOWN AND UNKNOWN) THAT MAY EXIST IN CONNECTION WITH THIS AGREEMENT. IN NO EVENT WILL COMPANY'S LIABILITY EXCEED THE TOTAL PRICE, AS SET FORTH IN THIS AGREEMENT.

## **Think AVL® Client Licenses**

The Company shall provide the Client with **(8) Think AVL® Client Software** licenses.
